

REGULATION OF THE MINISTER OF AGRICULTURE
OF THE REPUBLIC OF INDONESIA
NUMBER 38 OF 2020
ON

INDONESIAN SUSTAINABLE PALM OIL PLANTATION CERTIFICATION

BY THE BLESSINGS OF ALMIGHTY GOD

MINISTER OF AGRICULTURE OF THE REPUBLIC OF INDONESIA,

Considering : that to implement the provisions in Article 4 section (4), Article 6 section(3), Article 7, Article 12 section(4), Article 14, Article 15 section(3), Article 16 section (3), Article 17 section (3), Article 18 section (4), Article 26 section (2), and the ruling on development and supervision on the implementation of Indonesian Sustainable Palm Oil System (ISPO) Certification as regulated in Article 25 of the Presidential Regulation Number 44 of 2020 on Indonesian Sustainable Palm Oil Plantation Certification System, it is necessary to issue Regulation of the Minister of Agriculture on Indonesian Sustainable Palm Oil Plantation Certification.

Observing :

1. Article 17 section (3) of the 1945 Constitution of the Republic of Indonesia ;
2. Law Number 39 of 2008 on State Ministries (State Gazette of the Republic of Indonesia of 2008 Number 166, Supplement to the State Gazette of the Republic of Indonesia Number 4916);
3. Law Number 39 of 2014 on Plantations (State Gazette of the Republic of Indonesia of 2014 Number 308, Supplement to

- the State Gazette of the Republic of Indonesia Number 5613);
4. Law Number 22 of 2019 on Sustainable Agricultural Cultivation System (State Gazette of the Republic of Indonesia of 2019 Number 201, Supplement to the State Gazette of the Republic of Indonesia Number 6412);
 5. Presidential Regulation Number 45 of 2015 on Ministry of Agriculture (State Gazette of the Republic of Indonesia of 2015 Number 85);
 6. Presidential Regulation Number 44 of 2020 on Indonesian Sustainable Palm Oil Plantation Certification System (State Gazette of the Republic of Indonesia of 2020 Number 75);
 7. Regulation of the Minister of Agriculture Number 43/PERMENTAN/OT.010/8/2015 on Organization and Work Procedure of the Ministry of Agriculture (State Bulletin of the Republic of Indonesia of 2015 Number 1243);

HAS DECIDED:

To issue: REGULATION OF THE MINISTER OF AGRICULTURE ON
INDONESIAN SUSTAINABLE PALM OIL PLANTATION
CERTIFICATION.

CHAPTER I

GENERAL PROVISIONS

Article 1

In this Ministerial Regulation:

1. Oil Palm Plantation means any activity of natural resources, human resources, production facility, tools and machinery, cultivation, harvesting, processing management, and oil palm marketing.
2. Oil Palm Plantation Business means a business that produces Oil Palm Plantation goods and/or services.
3. Indonesian Sustainable Palm Oil Plantation hereinafter referred to as ISPO means an Oil Palm Plantation Business which is economically feasible, social-cultural feasible, and environmentally friendly based on the provision of legislation.

4. Oil Palm Plantation Business Actor hereinafter referred to as Business Actor means an Oil Palm Smallholder and/or an Oil Palm Plantation Company which manages an Oil Palm Plantation Business.
5. Oil Palm Plantation Company hereinafter referred to as Plantation Company means an enterprise of legal entity, established under the Indonesian laws and having its domicile within the Indonesian territory which manages an Oil Palm Plantation Business at a certain scale.
6. Oil Palm Smallholder hereinafter referred to as Smallholder is any individual of Indonesian citizen who runs an Oil Palm Plantation Business with a business scale which does not reach a certain scale.
7. Oil Palm Plantation Product means all products of Oil Palm Plantation crops and their processing which comprise of core product, processed product to extend storability, side product, and by-product.
8. ISPO Certification means a series of compliance assessment activities on an Oil Palm Plantation Business that pertain to the issuance of a written guarantee that an Oil Palm Plantation Business's products and/or management have met the ISPO principles and criteria.
9. ISPO Certification Body hereinafter referred to as ISPO CB means an independent compliance assessment institution which conducts an ISPO Certification.
10. National Accreditation Committee (Komite Akreditasi Nasional) hereinafter referred to as KAN means a non-structural institution which has the duty and responsibility in the accreditation on compliance assessment institutions.
11. Minister means the minister administering government affairs in the field of plantation.
12. Director General means high official in the Ministry of Agriculture administering functions in the field of plantation.
13. Office means a regional apparatus which performs functions in the field of plantation.

Article 2

The scopes of this Ministerial Regulation include:

- a. ISPO principles and criteria;
- b. the conditions and procedure of ISPO Certification;
- c. development and supervision;
- d. fee of ISPO Certification and funding facilitation; and
- e. administrative sanction.

CHAPTER II

ISPO PRINCIPLES AND CRITERIA

Article 3

- (1) To guarantee a sustainable Indonesian Oil Palm Plantation, ISPO Certification is applied to Plantation Companies and Smallholders.
- (2) The ISPO Certification to such Plantation Companies as referred to in section (1) issued by applying the principles covering:
 - a. compliance with legislation;
 - b. Implementation of good agriculture practices;
 - c. environmental management, natural resources, and biodiversity;
 - d. labor responsibilities;
 - e. social responsibility and community economic empowerment;
 - f. Implementation of transparency; and
 - g. continuous business improvement.
- (3) The ISPO Certification to Smallholders as referred to in section (1) is issued by applying the principles covering:
 - a. compliance with legislation;
 - b. application of good agriculture practices;
 - c. environmental management, natural resources, and biodiversity;
 - d. application of transparency; and
 - e. continuous business improvement.
- (4) The principles as referred to in section (2) and section (3) are elaborated in criteria.

Article 4

- (1) The criteria for the compliance with legislation as referred to in Article 3 section (2) point a include:
 - a. legality of land; and
 - b. legality of plantation business.
- (2) The criteria for the application of good agriculture practices as referred to in Article 3 section (2) point b include:
 - a. plantation planning; and
 - b. the implementation of good agricultural practices and processing.
- (3) The criteria for the environmental management, natural resources, and biodiversity as referred to in Article 3 section (2) point c include:
 - a. the implementation of those in relation to environmental permit;
 - b. waste management;
 - c. disturbance from an immobile source;
 - d. waste utilization;
 - e. management of hazardous and toxic materials (*bahan berbahaya dan beracun*, B3) as well as B3 waste;
 - f. fire and disaster control;
 - g. protected area and area of high conservation value;
 - h. mitigation on greenhouse gases (GHG) emission; and
 - i. protection to natural forest and peat land.
- (4) The criteria for manpower responsibilities as referred to in Article 3 section (2) point d include:
 - a. occupational safety and health (OSH);
 - b. administrative requirements in employment relationship;
 - c. workers' welfare and capability improvement;
 - d. use of children labor and discrimination in employment;
 - e. facilitation of unionization to establish the workers union; and
 - f. facilitation of the workers and employee's cooperative.
- (5) The criteria for social responsibility and community

economic empowerment as referred to in Article 3 section (2) point e include:

- a. social community responsibility;
- b. the empowerment of custom legal community/native;
and
- c. the development of local businesses.

(6) The criteria for the implementation of transparency as referred to in Article 3 section (2) point f include:

- a. the source of fresh fruit bunches (FFBs);
- b. the transparent calculation of K index and data related to K index;
- c. the equitable and transparent of fresh fruit bunches (FFBs) price;
- d. the openness for non-confidential information and complaint handling;
- e. the commitment not to do a bribery indication; and
- f. the traceable supply chain system.

(7) The criteria for continuous business improvement as referred to in Article 3 section (2) point g include:

- a. monitoring and renewal system on permit documents' validity period; and
- b. social responsibility and people's economic empowerment which must measurable for a certain period.

Article 5

(1) The criteria for compliance with legislation as referred to in Article 3 section (3) point a include:

- a. legality and management of Smallholder;
- b. Smallholder location;
- c. land disputes and compensation as well as other disputes;
- d. legality of Smallholder business; and
- e. environmental permit obligations.

(2) The criteria for the application of a good agriculture practice as referred to in Article 3 section (3) point b include:

- a. Smallholder institutional organization; and

- b. Smallholder management.
- (3) The criteria for the environmental management, natural resources, and biodiversity as referred to in Article 3 section(3) point c include:
 - a. fire prevention and handling; and
 - b. the preservation of biodiversity.
- (4) The criteria for the implementation of transparency as referred to in Article 3 section (3) point d include:
 - a. the sale and FFB's trading and mutual agreement of prices; and
 - b. availability of data and information.
- (5) The criteria for a continuous business improvement as referred to in Article 3 section (3) point e include improving performance by developing and implementing the action plans which support a continuous improvement of oil palm production.

Article 6

The principles and criteria as referred to in Article 4 and Article 5 are included in Annex 1 for Plantation Companies and Annex II for Smallholders as an integral part of this Ministerial regulation.

CHAPTER III

REQUIREMENTS AND PROCEDURES FOR ISPO CERTIFICATION

Part One

General

Article 7

- (1) ISPO Certification is applied mandatorily to Oil Palm Plantation Business.
- (2) Oil Palm Plantation Business as referred to in section (1) comprises of:
 - a. Oil Palm plantation business;
 - b. Oil Palm plantation processing business; and

- c. Oil Palm plantation business integrated with processing business.

Part Two

Requirement for ISPO Certification

Article 8

- (1) The application for ISPO Certification as referred to in Article 7 is submitted by a Business Actor to ISPO CB.
- (2) The Business Actor as referred to in section (1) comprises of:
 - a. Plantation Companies; or
 - b. Smallholders.

Article 9

- (1) The Plantation Companies as referred to in Article 8 point a must submit an application for ISPO Certification by providing required document as follows:
 - a. plantation business/permit;
 - b. ownership of land right;
 - c. environmental permit; and
 - d. the classes of plantation business issued by permit authorization.
- (2) The classes of plantation that can be applied for ISPO certification as referred to in section (1) include plantation class I, II, or III.

Article 10

- (1) In addition to meeting the requirements as referred to in Article 9, a Plantation Company must have an internal auditor who understands ISPO principles and criteria.
- (2) The internal auditor as referred to in section (1) has the responsibility to ensure the implementation of ISPO principles and criteria.
- (3) The understanding on ISPO principles and criteria as referred to in section (1) is obtained through ISPO training.

- (4) The ISPO training as referred to in section (3) is provided by an ISPO training institution.

Article 11

- (1) The Smallholders as referred to in Article 8 section (2) point b must submit an application for ISPO Certification by providing required document as follows:
 - a. letter of plantation business registration; and
 - b. ownership of land right
- (2) The application for ISPO Certification as referred to in section (1) can be submitted by Smallholder individually or in group.
- (3) The group as referred to in section (2) may take in the form of Smallholders' group, combined group, cooperative, or economic institution, in accordance with legislation.
- (4) The group as referred to in section (3) must have an Internal Control System/ICS team which is responsible in the implementation of ISPO.

Article 12

- (1) In addition to meeting the requirements as referred to in Article 11, Smallholders must have to enclose a Statement Letter on Environmental Management.
- (2) The Internal Control System Team as referred to in Article 11 section (4) must have to understand ISPO principles and criteria.
- (3) The understanding on ISPO principles and criteria as referred to in section (2) is obtained through ISPO training.
- (4) The ISPO Training as referred to in section (3) is provided by an ISPO training institution.

Article 13

Further provisions regarding the implementation of ISPO training by an ISPO Training Institution are stipulated by Director General.

Part Three
Procedures for Application Submission

Article 14

- (1) Applicants in the form of Plantation Companies submit an application for ISPO Certification to ISPO CB by enclosing the requirements as referred to in Article 9 and Article 10.
- (2) Applicants in the form of Smallholders submit an application for ISPO Certification to ISPO CB by enclosing the requirements as referred to in Article 10 and Article 12.
- (3) ISPO CB conducts a verification of the application requirements as referred to in section (1) and section (2).
- (4) In the event that the applicant does not comply the requirements as referred to in section (1) and section (2), the application is rejected and returned to the applicant along with the reasons of refusal.

Article 15

- (1) In the event that the verification as referred to in Article 14 section (3) has met the requirements, it is continued by with the preparation of an agreement.
- (2) The preparation of agreement as referred to in section (1) is made between the applicant and ISPO CB.
- (3) In the event that the preparation of agreement as referred to in section (2) is not reached a mutual agreement, the application is deemed withdrawn by the applicant.
- (4) In the event that the preparation of agreement as referred to in section (2) is reached a mutual agreement, the ISPO Certification Agreement is signed.

Part Four
Assessment on Principles and Criteria

Paragraph One
ISPO Certification Agreement

Article 16

- (1) The ISPO Certification Agreement as referred to in Article 15 section (4) at least contains:
 - a. rights and obligations;
 - b. certification plan;
 - c. surveillance ;
 - d. period of agreement;
 - e. an amendment to the rule of suspension and termination of certification;
 - f. dispute; and
 - g. force majeure.
- (2) The rights and obligations as referred to in section (1) point a constitute the applicant's and ISPO CB's rights and obligations.
- (3) The certification plan as referred to in section (1) point b include:
 - a. stage 1 (one) audit;
 - b. stage 2 (two) audit;
 - c. decision making on certification; and
 - d. the resources needed to do the certification.
- (4) The surveillance as referred to in section (1) point c is conducted by ISPO CB issuing the certificate each year within the certification cycle.
- (5) The period of agreement as referred to in section (1) point d is at least for 1 (one) certification cycle.
- (6) The amendment to the rule of certification suspension and termination as referred to in section (1) point e constitutes an activity when a suspension or termination on ISPO certification occurs.
- (7) The dispute as referred to in section (1) point f contains the settlement on any dispute that occurs.
- (8) The force majeure as referred to in section (1) point g constitutes a certain condition such as disaster.

Paragraph Two
Audit

Article 17

- (1) ISPO CB must conduct stage 1 (one) audit within a period of maximum 3 (three) months since the signing of ISPO Certification agreement as referred to in Article 15 section (4).
- (2) The stage 1 (one) audit as referred to in section (1) covers an assessment on:
 - a. review on the completeness and correctness of legality documents;
 - b. sample of plantation and the processing business which will be assessed at stage 2 (two) audit;
 - c. the critical points of plantation and processing business such as plantation and protected area, storage place of hazardous and toxic waste (B3), plantation with a certain slope; and
 - d. the parties/stakeholders who are selected as keynote speakers.

Article 18

- (1) If the results of stage 1 (one) audit have met such requirements of assessment as referred to in Article 17 section (2), it is continued by the stage 2 (two) audit.
- (2) If the results of stage 1 (one) audit do not meet requirements of assessment as referred to in Article 17 section (2), it is given a chance to make a correction within a period of maximum 6 (six) months as of the assessment.
- (3) If within such period as referred to in section (2) the applicant is unable to perform the correction, stage 1 (one) audit process is terminated and the application is returned to the applicant along with the reasons of termination.

Article 19

- (1) The stage 2 (two) audit as referred to in Article 18 section (1), covers an assessment on:

- a. all of the documents used by the applicant;
 - b. the implementation of ISPO principles and criteria at the plantation and processing business;
 - c. competence of the workers/employees involved at the plantation and processing business; and
 - d. confirmation on the application of ISPO principles and criteria to the parties/stakeholders selected as keynote speakers.
- (2) The implementation of such stage 2 (two) audit as referred to in section (1) uses sampling method:
- a. the size of sampling for initial certification must be determined under formula $(0,8\sqrt{y}) \times (z)$, where y is the estimated number/plantation/mill which will be assessed within one group and/or plantation company and z constitutes the multiplication which is determined by risk assessment. [low risk = multiplier 1; moderate risk = multiplier 2, high risk = multiplier 3].
 - b. the low risk as referred to in point a is for a plantation area which has the criteria of not bordering with a protected area (that covers an area which provides a protection to its subordinate area, nature conservation area and cultural heritage area, and or natural disaster susceptible areas), having no peat land, having a flat topography, and there is no replanting.
 - c. the moderate risk as referred to in point a is for a plantation area which has the criteria that part or the whole of it is located within a peat land area, a hilly topography, and or there is a replanting.
 - d. the high risk as referred to in point a is for a plantation area which has the criteria that part or the whole of it is located in a protected area (that covers an area which provides a protection to its subordinate area, nature conservation area and cultural heritage area, and or natural disaster susceptible areas).

Article 20

- (1) If the results of stage 2 (two) audit have met such requirements of assessment as referred to in Article 19 section (1), it is continued by a decision making on ISPO Certification.
- (2) If the results of stage 2 (two) audit do not meet requirements of assessment as referred to in Article 19 section (1), the applicant will be recommended to make an improvement within a period of maximum 6 (six) months since the notification of assessment results.
- (3) If within such period of maximum 6 (six) months as referred to in section (2) the applicant is unable to perform the improvement, stage 2 (two) audit process is terminated and the application is returned to the applicant along with the reasons of termination.

Article 21

- (1) In conducting the audit, ISPO CB determines the audit implementation period based on man-days.
- (2) The audit implementation as referred to in section (1) considers risk factors on the fulfillment of ISPO principles and criteria under the terms as follows:
 - a. stage 1 (one) audit and stage 2(two) audit on oil palm Plantation business take at least 13 (thirteen) man-days.
 - b. stage 1 (one) audit and stage 2(two) audit on the processing of Oil Palm Plantation processing business take at least 9 (nine) man-days.
 - c. stage 1 (one) audit and stage 2 (two) audit on Oil Palm plantation business integrated with processing business on 1 (one) plantation and 1 (one) processing take at least 18 (eighteen) man-days.
- (3) In the event of an addition to such man-days as referred to in section (2), ISPO CB must have to inform the applicant along with the reasons of addition.

Part Five

Decision Making and Issuance of Certificate

Article 22

- (1) Based on the results of audit starting from the application up to the report of phase 1 (one) audit and phase 2 (two) audit results as referred to in Article 16 to Article 19, ISPO CB conduct a decision making of not later than 1 (one) month after the auditing process finishes and is stated as complete.
- (2) ISPO CB in doing such decision making as referred to in section (1) is based on:
 - a. the clear and transparent mechanism; and
 - b. human resources without conflict of interest.
- (3) Decision making as referred to in section (1) takes the form of:
 - a. the issuance of ISPO certificate; or
 - b. a refusal to the issuance of ISPO certificate.
- (4) Decision on issuing an ISPO certificate as referred to in section (3) point a is followed-up by the issuance of ISPO certificate.
- (5) Decision on issuing an ISPO certificate as referred to in section (4) is published on ISPO CB's website not later than 30 (thirty) days after ISPO certificate decision.
- (6) In the event that ISPO CB refuses to issue the ISPO certificate as referred to in section (3) point b, the application is returned to the applicant along with the reasons of refusal.
- (7) ISPO CB is obligated to report the certificate issued as referred to in section (4) to the Minister.

Article 23

- (1) The ISPO certificate as referred to in Article 22 section (4) is valid for 5 (five) years.
- (2) ISPO certificates that have expired for a period of time are required to be renewed.
- (3) The renewal as referred to in section (1) is carried out by the

Business Actor by submitting an application for recertification not later than 6 (six) months prior to the expiration of validity period of the ISPO certificate.

- (4) The recertification is carried out through Stage 1 (one) and stage 2 (two) audits in accordance with the initial certification process.
- (5) If there are no significant changes that affect the fulfillment of the ISPO principles and criteria, the same ISPO CB can immediately conduct a stage 2 (two) audit.
- (6) The significant changes as referred to in section (5) are in the form of changes in permit documents, plantation area and/or processing unit capacity.
- (7) The audit time for recertification is 0.8 man-days of initial certification.
- (8) The decision to recertify is determined before the expiration of validity period of the ISPO certificate and a maximum of 4 (four) months from the last day of the stage 2 (two) audit.

Article 24

The ISPO certificate at least informs about:

- a. name and address of Business Actor;
- b. location, site coordinate points, plantation area, productivity and total production of the certified unit;
- c. ISPO certificate registration number;
- d. name and address of the ISPO CB;
- e. issuance date and expiration date of the ISPO certificate;
- f. KAN's logo and the ISPO CB accreditation number;
- g. supply chain model; and
- h. ISPO logo.

Article 25

- (1) In issuing an ISPO certificate, the ISPO CB must bear the ISPO logo.
- (2) Business actors that have obtained an ISPO certificate have the right to use the ISPO logo.
- (3) The ISPO logo as referred to in section (1) is the identity of the ISPO certified product.

- (4) The ISPO logo as referred in section (2) can be printed on plantations, processing units, and/or Oil Palm Plantation Products.
- (5) Further provisions regarding the designation and inclusion of the ISPO logo are stipulated by the Director General.

Article 26

Plantation Companies and Smallholder that have obtained an ISPO certificate are obligated to maintain and apply the ISPO principles and criteria as referred to in Article 3, Article 4 and Article 5 consistently.

Article 27

Plantation Companies and Smallholder reports the results of ISPO Certification to the office in charge of plantations in the province and district/city.

Part Six

Supply Chain Assessment

Article 28

- (1) ISPO CB conducts a supply chain assessment in order to ensure traceability of raw materials for fresh fruit bunches (FFBs) which are processed into Crude Palm Oil, Palm Kernel Oil and by-products.
- (2) The assessment as referred to in section (1) is carried out by the ISPO CB based on the procedures for applying the ISPO Certification and the ISPO principles and criteria for the Company as referred to in Article 3 and Article 4.

Article 29

- (1) The traceability guarantee for the supply chain of oil palm products as referred to in Article 28 is carried out for the scope of plantation, palm oil processing and bulking.
- (2) This supply chain tracing is carried out using the supply chain model of segregation and mass balance.

Article 30

- (1) The supply chain model for segregation as referred to in Article 29 section (2) requires that the raw material for fresh fruit bunches (FFBs) be 100% (one hundred percent) ISPO certified.
- (2) The mass balance model as referred to in Article 29 section (2) requires that the raw material for fresh fruit bunches is at least 30% (thirty percent) ISPO certified for:
 - a. first surveillance and an increase in the following year for plantation business integrated with processing units;
 - b. in the first cycle of ISPO certification for the plantation product processing unit business by increasing a percentage in every year.
- (3) The plantation companies implementing supply chain traceability guarantees for oil palm products as referred to in Article 28 can choose a supply chain model according to their needs.

Part Seven

Surveillance by the ISPO CB

Article 31

- (1) Oil Palm Plantation Businesses that have obtained the ISPO certificate as referred to in Article 22 section (4) are obligated to be subject to surveillance by the ISPO CB issuing the certificate within the certification cycle period.
- (2) The first surveillance is carried out from 9 (nine) months to 12 (twelve) months from the date of the certification decision.
- (3) Subsequent surveillance is carried out annually at the latest 1 (one) year from the previous surveillance.
- (4) In the event of any obstacles in implementing surveillance as referred to in section (2), an extension of surveillance period is given not later than 3 (three) months after the previous certification decision.

- (5) The extension of period as referred to in section (3) is reported to the Minister and KAN.

Article 32

- (1) If there is a non-conformity in the surveillance, the corrective actions must be completed within a maximum period of 3 (three) months from the closing meeting of surveillance.
- (2) The decision on the result of surveillance as referred to in section (1) in the form of maintenance, suspension, cancellation or termination of the ISPO certificate.
- (3) If the Business actor has obtained a decision to suspend as referred to in section (2), it will be given a time to take corrective actions not later than 6 (six) months before the decision to terminate or cancel the ISPO certificate is given.
- (4) The ISPO CB is obligated to report the suspended certificate as referred to in section (3) to the Minister.

Article 33

The sample size for surveillance was 0.6 \sqrt{y} and rounded up, and was taken from plantations that had not been assessed in the initial certification.

Part Eight

Dispute Resolution Team

Article 34

If within the process or determination of ISPO Certification there is dissatisfaction, the applicant can submit:

- a. complaints to the ISPO CB; and
- b. appeal to the ISPO Committee.

Article 35

- (1) The complaints as referred to in Article 34 point a may be filed by:
 - a. independent monitoring;

- b. Business Actor; or
 - c. affected communities.
- (2) The complaints as referred to in section (1) is submitted to the ISPO CB by attaching the required documents in the form of:
- a. complaints made in writing and signed by the claimant or their attorney;
 - b. supporting documents; and
 - c. proposed ways of solving the problem.

Article 36

- (1) In resolving complaints as referred to in Article 35, ISPO CB forms a team of complaint resolution.
- (2) The complaint resolution team as referred to in section (1) consisting of 3 (three) members with following elements:
- a. 2 (two) persons from ISPO CB; and
 - b. 1 (one) person from expert.
- (3) The team members as referred to in section (1), may not have a relationship with the party who filed the complaint and have no interest in resolving the complaint.
- (4) The complaint resolution team must resolve the complaint not later than 20 (twenty) days since the receipt of the complaint resolution requested.
- (5) The complaint handling mechanism can be access by the public.

Article 37

- (1) The applicant as referred to in Article 35 section (1) who is not satisfied with the decision of the complaint resolution team can submit an appeal to the ISPO Committee.
- (2) The ISPO Committee as referred to in section (1) establish an appeal committee consisting of 3 (three) members with following elements:
- a. 2 (two) persons from ISPO Committee members; and
 - b. 1 (one) person from expert.
- (3) The Committee members as referred to in section (2) may not have any relationship with the party submitting the

appeal request and have no interest in the settlement of appeal.

- (4) The appeal committee must settle the appeal request within 20 (twenty) days since receipt of appeal petition.
- (5) The decision of the appeal committee is final and binding.
- (6) The mechanism for handling appeals can be accessed by the public.

Article 38

- (1) The ISPO CB is obligated to report the settlement of complaints and appeals as referred to in Article 36 section (4) and Article 37 section (4) to the Minister.
- (2) During the process of complaint or appeal resolution, the ISPO certificate that has been issued remains valid.

Article 39

ISPO CB in submitting reports in the form of:

- a. certificate issued as referred to in Article 22 section (5);
- b. certificate that is suspended as referred to in Article 32 section (4); and
- c. settlement of applications as concern in complaints and appeals as referred to in Article 38 section (1), according to the format as contained in Annex III as an integral part of this Ministerial Regulation.

Part Nine

Special Audit and ISPO Certificate Transfer

Paragraph One

Special Audit

Article 40

- (1) A special audit is a field audit which is conduct outside the regular audit schedule and the mechanism is determined by the ISPO CB.
- (2) The special audit as referred to in section (1) is conduct due to:

- a. there is a request for expansion of ISPO Certification scope by the Business actor;
 - b. complaints/appeals follow-up; or
 - c. change in management and/or ownership.
- (3) The special audit due to an application for expansion of ISPO Certification scope by Business actor as referred to in section (2) point a can be carried out simultaneously with the surveillance.
- (4) The special audit due to the complaints/appeals follow-up as referred to in section (2) point b is carried out by verifying the complaints/appeals based on requests by independent Observers, Business actor, or affected communities.
- (5) The Special audits due to changes in management and/or ownership as referred to in section (2) point c is carried out by verifying data on changes in management and/or ownership of the Company.

Paragraph Two
ISPO Certificate Transfer

Article 41

- (1) A valid ISPO certificate can be transferred to another ISPO CB if:
- a. there is an application of ISPO certificate holder;
 - b. the ISPO CB accreditation is terminated by KAN; or
 - c. the ISPO CB accreditation is expired.
- (2) The Application for the ISPO certificate holder as referred to in section (1) point a can be conducted:
- a. after a period of 1 (one) certification cycle; and
 - b. based on the provisions regarding unfair competition.

Article 42

The procedure for transferring a certificate based on the application of ISPO certificate holder as referred to in Article 41 section (1) point a includes:

- a. the applicant submits a transfer application of the ISPO

- certificate to the chosen ISPO CB with a copy to the ISPO Committee and KAN;
- b. the receiving ISPO CB in transfer of the ISPO certificate coordinates with the ISPO CB issuing the ISPO certificate to verify the transfer application for the ISPO certificate;
 - c. verification in the transfer of the ISPO certificate is carried out in the form of document review and field observation;
 - d. ensures that the ISPO Certification has been subjected to document review, the receiving ISPO CB must conduct a field survey of the stage 1 (one) audit and stage phase 2 (two) audit of the ISPO certificate holder;
 - e. If there are non-conformity of the ISPO principles and criteria:
 - 1. The ISPO CB issuing the certificate must close the non-conformity before the certificate is transferred; or
 - 2. The receiving ISPO CB must ensure that the non-conformity is closed;
 - f. Upon conformance with ISPO principles and criteria, the receiving ISPO CB issues the certificate; and
 - g. The certificate that has been issued as referred to in point f is subject to surveillance in accordance with the previous ISPO Certification surveillance schedule.

Article 43

The procedure for transferring certificate if ISPO CB accreditation is revoked by KAN as referred to in Article 41 section (1) point b includes:

- a. The ISPO CB which accreditation is terminated is obligated to transfer the ISPO certificate;
- b. The transfer of certificates as referred to in point a is given to accredited and registered ISPO CB at the ISPO Committee;
- c. The transfer of certificate as referred to in point b under approval of ISPO Certificate holder and the ISPO CB receiving ISPO certificate;
- d. The ISPO CB receiving ISPO certificate transfer coordinates with the ISPO CB issuing ISPO certificate to verify the

- certificate transfer request;
- e. ensure that the certification has been subjected to a document review, the receiving ISPO CB must conduct a field review of stage 1 (one) Audit and stage 2 (two) audit of the ISPO certificate holder;
 - f. If there are non-conformity of the ISPO principles and criteria:
 - 1. The ISPO CB issuing the certificate must close the certificate before the certificate is transferred; or
 - 2. The receiving ISPO CB must ensure that the non-conformity is closed;
 - g. Upon conformance, the receiving ISPO CB issues the certificate; and
 - h. The certificates that have been issued as referred to in point g is subject to surveillance according to the previous ISPO Certification surveillance schedule.

Article 44

The procedure for transferring the certificate due to the expiry period of ISPO CB accreditation, as referred to in Article 41 section (1) point c includes:

- a. ISPO CB that has an expired accreditation and have not renewed their accreditation is obligated to transfer the ISPO certificate that has been issued to an accredited and registered ISPO CB at the ISPO Committee, under approval of the ISPO certificate holder and the ISPO CB receiving the ISPO certificate;
- b. the transfer of ISPO certificate as referred to in point a can only be done within a maximum period of 40 (forty) commenced from the expiration of the accreditation period;
- c. the ISPO CB receiving the certificate transfer coordinates with the ISPO CB issuing the ISPO certificate to review the certificate transfer application;
- d. Verification in certificate transfer is carried out in the form of document and field review;
- e. to ensure that the certification has been subjected to a document review, the receiving ISPO CB must conduct a

field review of the stage 1 (one) Audit and stage 2 (two) audit of the ISPO certificate holder;

- f. If there are non-conformity of the ISPO principles and criteria:
 - 1. The ISPO CB issuing certificate must close the certificate, before the certificate is transferred; or
 - 2. The ISPO CB receiving certificate must ensure that the non-conformity is closed;
- g. Upon conformance, the receiving ISPO CB issues the certificate following the rules for normal certification decisions; and
- h. The certificate that has been issued as referred to in section (7) is subject to surveillance in accordance with the previous ISPO Certification surveillance schedule.

Article 45

- (1) The transfer of ISPO certificate as referred to in Article 41 is required to be reported in writing by the Business actor to the ISPO Committee with a copy to KAN.
- (2) The report as referred to in section (1) is attached by a document in the form of a copy of agreement with the ISPO CB receiving the certificate transfer within a maximum period of 6 (six) days from the date of signing the contract.
- (3) The receiving ISPO CB publishes the decision of certificate transfer on the ISPO CB website and ISPO Committee website within a maximum period of 7 (seven) days from the signing of contract.
- (4) KAN verifies the compliance of ISPO certificate transfer process during assessment towards ISPO CB.

Article 46

- (1) The suspended ISPO certificate cannot be transferred to another ISPO CB.
- (2) The ISPO certificate transfer fee upon the request of the ISPO certificate holder is borne by the ISPO certificate holder.
- (3) The ISPO certificate transfer fee due to the termination or

expiration of the ISPO CB accreditation is borne by the ISPO CB.

Part Ten
ISPO CB Auditor

Article 47

- (1) ISPO CB auditor is obligated to meet the following general requirements:
 - a. has the skills to conduct audits based on SNI ISO 19011: 2018;
 - b. has certain specific technical capabilities in accordance with the function of audit field to be carried out including making the necessary technical considerations;

- (7) The initial ISPO Certification as referred to in section (3) point c is prioritized for Smallholder in group with an area of plantation between 500 (five hundred) hectares up to 1.000 (one thousand) hectares.

Article 54

- (1) In the event that the submission of financing for ISPO Certification uses APBN, Poktan, Gapoktan, cooperative or other economic institution of Smallholder submits proposal for ISPO Certification to the Head of Office of regency/municipality.
- (2) Head of Office of regency/municipality carries out verification of requirements as referred to in Article 11 and Article 12.

- (3) If the result of verification of requirements as referred to in section (2):
 - a. meets the requirements; it is delivered to the Head of Provincial Service; or
 - b. does not meet the requirements, it is returned to the applicant.
- (4) Head of Provincial Service carries out verification of proposal as referred to in section (3) point a.
- (5) If the result of Verification of proposal as referred to in section (4):
 - a. meets the requirements, it is delivered to the Director General; or
 - b. does not meet the requirements, it is returned to the Head of Office of regency/municipality.
- (6) Directorate General carries out verification of proposal as referred to in section (5) in consideration of the fund availability in APBN.
- (7) If the fund in APBN is available, the financing process of ISPO Certification is carried out in accordance with legislation in the field of state finance.

Article 55

- (1) In the event that the submission for financing of ISPO Certification uses APBD of Province, Poktan, Gapoktan, cooperative or other economic institution of Smallholder submit proposal for ISPO Certification to the Head of Office of regency/municipality.
- (2) Head of Office of regency/ municipality carries out verification of requirements as referred to in Article 11 and Article 12.
- (3) If the result of verification of requirements as referred to in section (2):
 - a. meets the requirements, it is delivered to the Head of Provincial Service; or
 - b. does not meet the requirements, it is returned to the applicant.

- (4) Head of Provincial Service carries out verification of proposal as referred to in section (3) point a.
- (5) Head of Provincial Service carries out verification of proposal as referred to in section (4) in consideration of the fund availability in APBD of province.
- (6) If the fund in APBD of province is available, the financing process of ISPO Certification is carried out in accordance with legislation in the field of state finance.

Article 56

- (1) In the event that the submission for financing of ISPO Certification uses APBD of regency/municipality, Poktan, Gapoktan, cooperative or other economic institution of Smallholder submit proposal for ISPO Certification to the Head of Office of /regency/municipality.
- (2) Head of Office of regency/municipality carries out the verification of requirements as referred to in Article 11 and Article 12.
- (3) Head of Office of regency/ municipality carries out verification of proposal as referred to in section (3) in consideration of the fund availability in APBD of regency/municipality.
- (4) If the fund in APBD of Province is available, the financing process of ISPO Certification is carried out in accordance with legislation in the field of state finance.

Article 57

In the event that the submission for financing of ISPO Certification uses other legitimate sources in accordance with the provisions of legislation, Poktan, Gapoktan, cooperative or other economic institution of Smallholder submit proposal for ISPO Certification to the fund provider in accordance with the mechanism in accordance with the provisions of legislation.

CHAPTER VI
ADMINISTRATIVE SANCTION

Article 58

- (1) Minister imposes administrative sanction to the Plantation Company that does not have ISPO certificate as referred to in Article 22 section (4) in the form of:
 - a. written reprimand;
 - b. temporary suspension; or
 - c. termination of business permit.
- (2) The written reprimand as referred to in section (1) point a is provided as much as 1 (one) time within a grace period of 6 (six) months to carry out improvement.
- (3) If the reprimand as referred to in section (2) is not implemented, then it is subject to administrative sanction in the form of temporary suspension of plantation business for 6 (six) months as of the decision of temporary suspension of plantation business is submitted.
- (4) If within the period as referred to in section (3), Plantation Company does not have ISPO certificate, then it is subject to administrative sanction in the form of termination of business permit to the permit authorization in accordance with the authority.

			natural forest (IUPHHK-HA) and reports it to the grantor of permit.						
1.2 Legality of Plantation Business									
	1.2.1 Form of Legal Entity Plantation Business actor must be in the form of Legal Entity and has all permits necessary to be recognized as business that has legal entity basis. (I,B,P)	1. Plantation Business actor must be a Legal Entity	1. Availability of document on Deed of Establishment that is validated by the relevant government agency and in accordance with the name of plantation organization. Business line and type of ownership of Plantation Business actor (Foreign Investor (PMA) or Local) in accordance with the business being	√		√			Compliant If having document on incorporation of Plantation Business actor Non-compliant If not having document on incorporation of Plantation Business actor

				run at present.					
				2. Availability of Deed of the latest amendment that is validated by the relevant government agency and in accordance with the name of plantation organization.	√		√		
			2. Has Taxpayer Number (NPWP) that is appropriate with the location of the domicile of Plantation Business actor, Registration Certificate of Plantation Business actor (TDP) and Business Place Permit (SITU) and Trade Business Permit	1. Availability of Taxpayer Identification Number (NPWP) that is in accordance with the taxpayer object.	√		√		Compliant If having document on NPWP, TDP, SITU, SIUP
				2. Availability of valid Registration Certificate of Plantation Business actor (TDP) and validated by the relevant agency.	√		√		

			(SIUP).	3. Availability of valid Business Place Permit (SITU) and validated by the relevant agency.	√		√			
				4. Availability of valid Trade Business Permit (SIUP) in accordance with the business being run and validated by the relevant agency.	√		√			
			3. All buildings with minimum category of semi-permanent, is obligated to have Building Construction Permit (IMB) that is in accordance with the valid Perda (Regional Regulation).	Availability of Building Construction Permit (IMB) for building (permanent/semi-permanent house, mill in HGU, office, warehouse, workshop, etc.) that is obtained from the local government agency.	√		√			<p>Compliant If having IMB</p> <p>Non-compliant If not having IMB</p>

		4. POM building and the facility that is located outside HGU has Certificate of Right to Use of Building that is issued by the National Land Agency (BPN)	1. Availability of document on Right to Use of Building (HGB) for building that is located outside HGU.	√		√			Compliant If having HGB Non-compliant If not having HGB
			2. Availability of Decision of Right to Use of Building (Decision Letter from Head of BPN) must be shown.	√		√			
			3. Conformity of name of holder of Right to Use of Building (HGB) with the name of certification unit.	√		√			
			4. Conformity of type of use or utilization of building (HGB) with the decision on	√		√		√	

				provision of right.					
				5. Location of building is located within the Right to Use of Building (HGB).	√		√		
				6. Validity period of Right to Use of Land (HGU, HGB, HP) at the time of application.	√		√		
			5. Pay Land and Building Tax (PBB) every year, PPH and PPN in accordance with the applicable provisions. Report the SPT of Tax that is in accordance with the local Perda.	1. Availability of proof of payment/deposit of Land and Building Tax (PBB) for the last 1 (one) year.	√		√		Compliant If having PBB, PPh, PPN Non-compliant If not having PBB, PPh, PPN
				2. Availability of proof of payment/deposit of Income Tax (PPH) for the last 3 (three) months and Value Added Tax (PPN) for	√		√		

				the last 1 (one) year.					
				3. Availability of proof of report on Tax Return (SPT) to the relevant agency.	√		√		
		1.2.2 Environmental Permit Has legality requirements related to the environment prior to implement the activities. (I,B,P)	Has Environmental Permit that is issued by the competent official in accordance with legislation.	Availability of Environmental Permit that is obtained from the competent official, and in accordance with the name of Plantation Business actor	√		√		Compliant If having Environmental Permit in accordance with the applicable provisions Non-compliant If not having Environmental Permit in accordance with the applicable provisions
		1.2.3 Facilitation of	Has cooperation	1. Availability of	√		√	√	Compliant

		<p>People's Plantation Development</p> <p>Plantation Business actor that applies for IUP-B or IUP with acreage of 250 ha or more, is obligated to facilitate the development of nearby community plantation with a minimum area of 20% of the acreage of IUP-B or IUP, in accordance with the applicable provisions of legislation.</p> <p>(I,B,P)</p>	<p>document of Plantation Business actor with the community nearby the plantation regarding facilitation of the community plantation development.</p>	<p>document on Joint Agreement between Plantation Business actor with the nearby community and acknowledged by the office in charge of plantation.</p>						<p>If having cooperation document of Plantation Business actor with the nearby community</p> <p>Non-compliant</p>
				<p>2. Availability of document on realization of total area of community plantation development area at least 20% of the total area of Plantation Business Permit (IUP/IUP-B) owned.</p>	√		√			<p>If not having cooperation document of Plantation Business actor with the nearby community</p>
				<p>3. Obligation to facilitate the development of</p>	√		√		√	

				<p>community plantation with an area of 20% of the total area of core plantation does not apply for Plantation Business actor that has carried out Community Nucleus Plantation (PIR-BUN, PIR-TRANS, PIR KKPA) patterns or other nucleus plasma cooperation pattern.</p> <p>While for Plantation Business actor that has not carried out the cooperation is obligated to carry out productive activities for the nearby community that are</p>						
--	--	--	--	--	--	--	--	--	--	--

				acknowledged by the governor or regent/mayor in accordance with the authorities.						
				4. Legal entity in the form of cooperative is not obligated to facilitate the development of community plantation with an area of 20%.	√		√			
				5. Availability of report on realization progress of facilitation of development of nearby community plantation to the relevant government agency (Plantation Office).	√		√			

		1.2.4 Plantation Permit (I.B.P)	Has Plantation Business Permit (IUP).	1. Document of Plantation Business Permit (IUP/SPUP, IUP-B/ITUBP, IUP-P/ITUIP, plantation business permit that is issued by the Head of BKPM on behalf of the Minister of Agriculture; Plantation Business Permanent Permit (ITUP) from the Minister of Agriculture may be shown.	√		√			Compliant If having document on IUP
				2. IUP is issued by the competent government agency in accordance with legislation.	√		√			Non-compliant If not having document on IUP
				3. Area of IUP must be greater or equal to the	√		√			

			area of HGU/HGB.					
			4. All plantation operational area are included in IUP.	√		√		√
			5. Location of IUP is in accordance with the Spatial Plan.	√		√	√	
			6. Total installed unit and capacity or production volume of products from Palm Oil Mill (POM) is in accordance with the capacity rated in IUP.	√		√		√
			7. Commodity specified in IUP document is in accordance with the commodity in business.	√		√		√
			8. For IUP-P, shown	√		√		√

				with availability of FFBs raw material that is processed at POM at least 20% of its owned plantation or shown with the existence of cooperation agreement for supply of FFBs raw material between POM and smallholder, at least 5 (five) years.						
2	APPLICATION OF GOOD AGRICULTURE PRACTICES	2.1 Plantation Planning Plantation Business actor must have short, medium and long-term planning to produce sustainable palm oil. (I,B,P)	1. Plantation Business actor has strategic plan and contains vision and mission of the Plantation Business actor that support sustainable business.	1. Vision and Mission of Plantation Business actor that supports sustainable business and validated by the management of Plantation Business actor.	√		√	√		Compliant If having strategic plan. Non-compliant If not having strategic plan.
				2. Evidence of		√	√	√	√	

				dissemination of Vision and Mission of Plantation Business actor that supports sustainable business to workers and work partners.						
			2. Plantation Business actor has Organizational Structure of Palm Oil Plantation Business actor.	1. Availability of document on Organizational Structure of Palm Oil Plantation Business actor that is validated by the Management.	√		√	√	√	Compliant If having organizational structure. Non-compliant If not having organizational structure.
				2. Document on Organizational Structure is in accordance with the operational activities.	√		√	√	√	
				3. Availability of job	√		√	√		

				description and responsibilities for each position and level of organizational structure, including determining staff specifically as deputy management to be responsible in overall SRP (Supply Chain System).						
			3. Plantation Business actor has Planning, Monitoring and Evaluation of Plantation Business.	1. Document of annual plan and annual report that is completely explaining the activities of Plantation Business actor. Including plan on supply of fruits and sources of fruits.	√		√			Compliant If having planning, monitoring and evaluation of plantation business.
				2. Document on			√	√		

				Medium Term and Long Term Strategic Plan and implementation of internal audit activities/self-assessment regarding application of the plan.						planning, monitoring and evaluation of plantation business.
				3. Report on Result of Financial Audit of Plantation Business actor.		√	√	√		
			4. Plantation Business actor has Human Resources (HR) Management System of Plantation Business actor.	1. Availability of mechanism of acceptance of workers.	√		√	√		Compliant If having HR management system.
				2. Availability of document on waging system and provision of incentives.	√		√	√		Non-compliant If not having HR management
				3. Availability of	√		√	√		

				document on career level system and work achievement assessment.						system.
				4. Availability of document on training system.	√		√	√		
		5. Availability of document on plan and realization of land utilization (HGU) for the development of plantation, palm oil processing unit, office, housing for employees, supporting facilities and other needs.	1. Area of land utilization realization in accordance with the area of HGU or HGU and HGB.	√		√	√			Compliant If having document on plan and realization of land utilization.
			2. Realization of mill capacity in accordance with the plantation business permit.	√		√	√	√	Non-compliant If not having HR document on plan and realization of land utilization.	
			3. Availability of annual report on plantation progress to local provider of			√	√	√		

				plantation business unit.						
				4. Availability of document for undertaking the entire area that is technically able to be planted after 6 (six) years as of obtaining right to land (for Plantation Business actor that obtains permit after Law Number 39 of 2014)		√	√	√		
		2.2 Application of Cultivation Techniques and Product Processing								
		2.2.1 Land Clearing Land clearing that meets the principles of land and water conservation. (I,B)	1. Plantation Business actor must have Standard Operating Procedure (SOP) for land opening including land structuring.	1. Availability of SOP for land clearing without burning including land structuring.		√	√	√		Compliant If having SOP. Non-compliant If not having SOP.
				2. Availability of SOP		√	√	√		

				for land clearing, in consideration of the principles of land and water conservation.						
				3. Availability of SOP for land clearing with terracing if the Plantation Business actor has land slope of greater than 30%.		√	√	√		
		2. Applying the principles of land and water conservation in the process of new land clearing and plantation operational that is stipulated based on the applicable legislation.	1. Making of drainage system, terracing for land with certain slope, planting cover crops to minimize erosion and land damage/degradation.	√		√		√	Compliant If having document when applying principles of land and water conservation in its land clearing.	
			2. Land clearing and planting of palm oil has certain distance with	√		√		√		Non-compliant

				<p>the edge of dam/lake, which has been stipulated by the government. If the edge of such dam/lake has not been stipulated by the government, thus the distance between land clearing and/or planting of palm from the edge of dam/lake is stipulated by the internal SOP of Plantation Business actor.</p>						<p>If not having document when applying principles of land and water conservation in its land clearing.</p>
				<p>3. Land clearing and planting of palm oil has certain distance with the edge of water springs, where such</p>	√		√		√	

				<p>edge of water springs has been stipulated by the government. If the edge of such water springs has not been stipulated by the government, thus the distance between land clearing and/or planting of palm from the edge of water springs is stipulated by the internal SOP of Plantation Business actor.</p>						
				<p>4. Land clearing and planting of palm oil has certain distance with the edge of river, where such edge of river has</p>	√		√		√	

				been stipulated by the government. If the edge of such river has not been stipulated by the government, thus the distance between land clearing and/or planting of palm from the edge of river is stipulated by the internal SOP of Plantation Business actor.						
				5. Land clearing and planting of palm oil has certain distance with the edge of tributary, where such edge of tributary has been stipulated by the government. If the edge	√		√		√	

				<p>of such tributary has not been stipulated by the government, thus the distance between land clearing and/or planting of palm from the edge of tributary is stipulated by the internal SOP of Plantation Business actor.</p>						
				<p>6. Land clearing and planting of palm oil has certain distance with the edge of cliff, where such edge of cliff has been stipulated by the government. If the edge of such cliff has not been stipulated by the</p>	√		√	√	√	

				<p>government, thus the distance between land clearing and/or planting of palm from the edge of cliff is stipulated by the internal SOP of Plantation Business actor.</p>						
				<p>7. Land clearing and planting of palm oil has certain distance with the edge of coast, where such edge of coast has been stipulated by the government. If the edge of such coast has not been stipulated by the government, thus the distance between land</p>	√		√	√	√	

				clearing and/or planting of palm from the edge of coast is stipulated by the internal SOP of Plantation Business actor.						
			3. Has evidence that supports the non-existent of burning activities by the operational of Plantation Business actor in the plantation concession area, such as the history of occurrence of hotspot in the concession area and Activity Report of land clearing with mechanical system.	1. Availability of document on activity of land clearing without burning.		√	√	√	√	<p>Compliant</p> <p>If having evidence.</p> <p>Non-compliant</p> <p>If not having evidence.</p>
				2. Availability of report on fire mitigation measures.		√	√	√	√	
				3. Availability of Activity Report for land clearing with mechanical system.		√	√	√	√	
				4. Availability of SOP for land clearing without burning.		√	√	√	√	

			4. Plantation Business actor has record and map on land clearing and structuring.	1. Availability of record and map on land structuring including block structuring, construction of plantation road and emplacement.	√		√	√	√	<p>Compliant</p> <p>If having record and map on land clearing and structuring.</p> <p>Non-compliant</p> <p>If not having record and map on land clearing and structuring.</p>
				2. Availability of record on construction of drainage system, terracing for land with certain slope, planning of cover crops to minimize erosion and land damage/degradation.	√		√	√	√	
				3. Availability of record on land clearing in accordance with the requirements and	√		√	√	√	

				obligations specified in the environmental permit or Environmental Impact Assessment (AMDAL)/Environmental Management Plan and Environmental Monitoring Plan in accordance with the provisions of legislation.						
		<p>2.2.2 Seeding</p> <p>Plantation Business actor in carrying out planting must use certified superior seed.</p> <p>(I,B)</p>	<p>1. Plantation Business actor has SOP for Seedling.</p>	<p>1. Availability of SOP for use of cultivated seed (as of year 1995 cultivated seed that originates from source of seed that has obtained recognition from the government</p>	√		√	√	√	<p>Compliant</p> <p>If having SOP.</p> <p>Non-compliant</p> <p>If not having SOP.</p>

				and certified from the competent institution).						
				2. Must be able to show having SOP for use of seed with quality and age in accordance with the technical provisions.	√		√	√	√	
				3. SOP for handling seed that does not meet the requirements.	√		√	√	√	
			2. Plantation Business actor has document on implementation of supply of certified seed.	1. Availability of seed certificate from certified seed producer that is issued by the Ministry of Agriculture.	√		√	√	√	Compliant If having document. Non-compliant If not having document.
				2. Availability of document on implementation of			√	√	√	

				supply of sprout starting from the application up to the receipt of sprout.						
			3. Handling seed that does not meet the requirements.	Availability of Minutes of destruction of seed that does not meet the requirements.	√		√	√	√	<p>Compliant</p> <p>If having document.</p> <p>Non-compliant</p> <p>If not having document.</p>
		2.2.3 Planting on Mineral Land (LB)	1. SOP on technical guidelines for planting palm oil plantation in mineral land.	Availability of SOP starting from the planting planning (plant distance) up to the planting of seed in accordance with the practices of legislation related to the guidelines for palm oil cultivation.	√		√	√	√	<p>Compliant</p> <p>If having SOP.</p> <p>Non-compliant</p> <p>If not having SOP.</p>
			2. Availability of	1. Availability of		√	√	√	√	Compliant

			document on application of planting in accordance with the applicable standard or regulation in mineral land.	document on planting plan in accordance with SOP.						If having document. Non-compliant
				2. Availability of document on planting realization in accordance with SOP.	√		√	√	√	If not having document.
		2.2.4 Planting on Peat Land (I,B)	1. SOP on technical guidelines for planting palm oil plantation in peat land.	Availability of SOP for planting on peat land in accordance with the practices of legislation related to peat land utilization for palm oil cultivation.	√		√	√	√	Compliant If having SOP. Non-compliant If not having SOP.
			2. Regulation on descent of high peat soil layer.	1. Availability of SOP for regulation on descent of high peat soil layer.	√		√	√	√	Compliant If having SOP. Non-compliant If not having
					2. Availability of tool	√		√	√	√

				for measuring the descent of peat soil layer.						
				3. Availability of facilities and infrastructures related to the management of planting on peat land.	√		√	√	√	
			3. Documentation of recording on application of planting on peat land in accordance with the procedures and/or legislation.	1. Availability of document on result of identification of depth of peat in HGU area that is carried out by the internal or external party of the company.	√		√	√	√	Compliant If having document. Non-compliant If not having document.
				2. Availability of result of SOP implementation related to the planting and maintenance of palm oil in peat land.	√		√	√	√	

				3. Availability of result of monitoring on subsidence and regulation of height of ground water surface.	√		√	√	√	
				4. Availability of document on identification and mapping in peat ecosystem with protection function that is removed from planting.	√		√	√	√	
		2.2.5 Plant Maintenance (I,B)	1. Procedures for plant maintenance by applying Good Agriculture Practices (GAP) for palm oil.	Availability of SOP for plant maintenance in accordance with the practices of legislation related to the palm oil cultivation.	√		√	√	√	Compliant If having SOP. Non-compliant If not having SOP.
			2. Availability of record	1. Availability of	√		√	√	√	Compliant

			<p>on application of palm oil plant in accordance with the applicable standard or regulation and principles of environmental management, including fertilization in accordance with the recommendation, maintenance of plate, maintenance of cover crops and plantation sanitation.</p>	<p>document on plant maintenance plan, which includes:</p> <ul style="list-style-type: none"> a. plant consolidation, b. plant insertion, c. maintenance of tree plate, d. maintenance of cover crops, e. fertilization based on analysis of soil and leaves, f. maintenance of terracing and height of water level, g. drainage, h. sand shoots (immature plants). 						<p>If having document.</p> <p>Non-compliant</p> <p>If not having document.</p>
				<p>2. Document on plant maintenance within a</p>						

				<p>year and 1 (one) year before, which includes:</p> <ul style="list-style-type: none"> a. plant consolidation, b. plant insertion, c. maintenance of tree plate, d. maintenance of cover crops, e. fertilization based on analysis of soil and leaves, f. maintenance of terracing and height of water level, g. drainage, h. sand shoots (immature plants). 						
		<p>2.2.6 Organism Control Plantation Business actor must apply the Integrated</p>	<p>1. Plantation Business actor has SOP for observation and control</p>	<p>Availability of SOP for observation and control of plant disturbing</p>	√		√	√	√	<p>Compliant If having SOP. Non-compliant</p>

		<p>Pest Management (IPM) system in accordance with the Technical Guidelines. (I,B)</p>	<p>of plant disturbing organism.</p>	<p>organism that can guarantee that: a. control of plant disturbing organism is carried out integrally (Integrated Pest Management/IPM), namely integrating various control techniques mechanically, biologically, physically and chemically, b. application of early warning system (EWS) through observation of plant disturbing organism is carried out periodically, c. pesticide used has</p>						<p>If not having SOP.</p>
--	--	---	--------------------------------------	--	--	--	--	--	--	---------------------------

				<p>been registered at the Commission for Pesticides of the Ministry of Agriculture,</p> <p>d. handling pesticide waste is carried out in accordance with the technical guidelines of the Commission for Pesticides to minimize adverse impact to the environment,</p> <p>e. staff (group) of controller that has been trained by the competent institution and approved by the Commission for Pesticides specific for</p>

				<p>the use of limited pesticide,</p> <p>f. warehouse for storage of equipment and materials for control of plant disturbing organism,</p> <p>g. species of host plant as natural enemy.</p>						
			<p>2. Procedures for mitigation on use of pesticides for pests/weeds spraying activities that has been approved by the management of Plantation Business actor that is authorized and there is evidence of</p>	<p>1. Availability of SOP for mitigation of use of pesticide materials, including: handling and management of pesticides, namely:</p> <p>a. grouping of pesticides,</p> <p>b. procedures for use of pesticides,</p> <p>c. storage of pesticides,</p>	√		√	√	√	<p>Compliant</p> <p>If having SOP.</p> <p>Non-compliant</p> <p>If not having SOP.</p>

				d. pesticides poisoning and the symptoms, e. first aid to pesticides poisoning.						
				2. Availability of evidence of dissemination of procedures to the relevant workers.	√		√	√	√	
			3. Recording or document on implementation of observation and control of plant disturbing organism as well as use of type of registered pesticides.	1. Availability of recording of type of host plant as natural enemy.	√		√	√	√	Compliant If having recording. Non-compliant If not having recording.
				2. Availability of proof of implementation of procedures on observation and control of plant disturbing organism.	√		√	√	√	
					3. Availability of	√		√	√	

				recording on use of pesticides that are registered at the Commission for Pesticides of the Ministry of Agriculture and pesticide permit is still in validity period.						
			4. Has written commitment of the management of Plantation Business actor for reduction of pesticides in in plantation operational activities.	Availability of written document set forth by the Plantation Business actor related to the commitment in reducing pesticide material, in plant maintenance activities.	√		√	√		<p>Compliant</p> <p>If having document.</p> <p>Non-compliant</p> <p>If not having document.</p>
			5. Availability of recording on use of pesticides and the reduction up to certain	Availability of recording on use of pesticides and the reduction up to certain	√		√	√	√	<p>Compliant</p> <p>If having recording.</p> <p>Non-compliant</p>

			limit using substitution of environmentally-friendly materials/use of biological agency for maintenance of plantation plants.	limit using substitution of environmentally-friendly materials/use of biological agency for maintenance of plantation plants.						If not having recording.	
		2.2.7 Harvesting Plantation Business actor carries out harvesting on time using good and correct method and records the FFBS production. (I,B)	1. Availability of SOP for harvesting palm oil and document on application of harvesting activities.	1. Availability of SOP for implementation of harvesting in accordance with the practices of legislation related to the guidelines for palm oil cultivation.	√		√	√		Compliant If having SOP. Non-compliant If not having SOP.	
				2. Availability of document on application of harvesting of palm oil.		√		√	√	√	
				2. Availability of document on monthly, quarterly, semester and	Availability of data on annual FFBS production.	√		√	√	√	Compliant If having data. Non-compliant

			annual production.							If not having data.
			3. Availability of document on production projection.	Availability of data on projection of FFBS production of next year.	√		√	√	√	Compliant If having data. Non-compliant If not having data.
		2.2.8 Transportation of Fresh Fruit Bunches (FFBS) Plantation Business actor must ensure that FFBS harvested must be immediately transported to the processing plant to avoid quality degradation.	1. Availability of SOP for transportation of FFBS and the application.	1. Availability of SOP for implementation of transportation of FFBS in accordance with the guidelines for palm oil cultivation.	√		√	√	√	Compliant If having SOP. Non-compliant If not having SOP.
			2. Proof of application of procedures for implementation of transportation of FFBS.		√		√	√	√	
		(I,B)	2. Availability of recording or document on implementation of	Availability of recording on implementation of	√		√	√	√	Compliant If having recording.

			transportation of FFBS.	transportation of FFBS.						Non-compliant If not having recording.
		<p>2.2.9 Receipt of FFBS in Palm Oil Processing Unit Plantation Business actor ensures that FFBS received in accordance with the requirements that have been set forth. (I,P)</p>	1. Availability of SOP for receipt and inspection/sorting of FFBS.	Availability of SOP for receipt, inspection and sorting of FFBS in accordance with the criteria of sorting of fruits received.	√		√	√	√	Compliant If having SOP. Non-compliant If not having SOP.
			2. Document on receipt of FFBS that is in accordance and not in accordance with the requirements.	Availability of document on result of sorting of FFBS in the mill in accordance with SOP for receipt of FFBS.	√		√	√	√	Compliant If having document. Non-compliant If not having document.
			3. Receipt of FFBS in POM in accordance and not in accordance with the quality standard of FFBS set forth by the	1. Receipt of FFBS through sorting of FFBS based on the provisions of the Ministry of	√		√	√	√	Compliant If having document. Non-compliant If not having

			Ministry of Agriculture.	Agriculture.						document.
				2. Documentation and implementation of handling the result of sorting of FFBS.	√		√	√	√	
			4. Access to the shipment of FFBS from the plantation site	1. Availability of road maintenance program in the plantation.	√		√			Compliant If having document.
			(Output Collection Facility/TPH) to the processing facility (POM) must be maintained to keep the quality of FFBS.	2. Availability of recording on result of realization and evaluation that supports the maintenance of quality of FFBS.	√		√		√	Non-compliant If not having document.
		2.2.10 FFBS Processing	1. Plantation Business actor has SOP for processing processes as well as monitoring process and measurement of quality	Availability of SOP for processing processes (starting from production planning up to measurement of product quality) in	√		√	√	√	Compliant If having SOP. Non-compliant If not having SOP.
		Plantation Business actor must plan and implement processing of FFBS through the application of Good Manufacturing								

		Practices (GMP). (I,P)	of Crude Palm Oil (CPO).	accordance with the guidelines for handling post-harvest of agricultural products from good plant origin.						
			2. Plantation Business actor has recording/document on implementation of SOP for processing processes as well as monitoring process and measurement of quality of Crude Palm Oil (CPO).	Availability of document on processing processes, as well as monitoring process and measurement of quality of FFBS into product.	√		√	√	√	Compliant If having document. Non-compliant If not having document.
			3. Availability of document on use of water for palm oil processing unit.	Availability of document on use of water for palm oil processing unit.	√		√	√	√	Compliant If having document. Non-compliant If not having

										document.
3	MANAGEMENT OF ENVIRONMENT, NATURAL RESOURCES, AND BIODIVERSITY	3.1 Implementation Related to Environmental Permit Plantation Business actor must implement its obligation in accordance with the environmental permit. (I,B,P)	1. Has document related to the result of management and monitoring of environment, including the repowering to the competent institution.	1. Availability of environmental documents (Environmental Impact Assessment, Environmental Management and Monitoring Programs, Environmental Evaluation Studies, and the kinds) that has been validated by the relevant agency.	√		√	√		Compliant If having document. Non-compliant If not having document.
				2. The scope of review on environmental documents (Environmental Impact Assessment, Environmental	√		√	√		

				<p>Management and Monitoring Programs, Environmental Evaluation Studies, and the kind) already covers all of operational activities of plantation business actors, among others: (a) the width of review area covers operational area; (b) mill/'s processing capacity plan; (c) waste management</p>						
				<p>3. The conformance of (installed) mill's capacity to such Environmental documents in accordance with the</p>	√		√			

			applicable requirements					
			4. The environmental management and monitoring plan has been implemented	√		√		√
			5. Environmental management and monitoring report has covered all of such activities that conform to the legalized environmental documents	√		√	√	
			6. The format of environmental management and monitoring report refers to the related rule	√		√		
			7. Environmental management and	√		√	√	

				<p>monitoring report has been submitted periodically to the related instances on periodical basis in accordance with the legalized environmental documents</p>					
			<p>2. POM has a permit to utilize liquid waste for such Land Application and the dumping to the water-body which conform to the applicable quality standard requirements</p>	<p>1. It can be shown such valid permit for the utilization of liquid waste or the dumping of liquid waste to the water-body (river, sea) from the related governmental instances</p>	√		√		<p>Compliant</p> <p>If holds the document of liquid waste utilization permit</p> <p>Non-compliant</p>
				<p>2. The location of liquid waste utilization conforms to those determined in the liquid</p>	√			√	<p>If does not hold the document of liquid waste utilization</p>

				waste utilization permit						permit
				3. There did not occur any leakage of liquid waste from the Waste water treatment plant (IWWTP) or at the application on plantation land (Land Application) which pollutes the water body	√				√	
			3. Having a Waste water treatment plant (WWTP) to meet the quality standard of waste water. POM has an adequate Waste water treatment plant (WWTP)	It is available the layout documentation of Waste water treatment plant which explains the function of each plant(pond)	√		√			<p>Compliant</p> <p>If has an IPAL installation</p> <p>Non-compliant</p> <p>If does not have an IPAL installation</p>
		3.2 Waste Management Plantation business actor	1. Having a SOP regarding waste (solid,	1. Liquid waste processing at WWTP	√				√	<p>Compliant</p> <p>If has the</p>

		performs the obligation to manage oil palm waste in accordance with the statutory regulation (<i>I, P</i>)	liquid, and aerial) management	has been conducted well and there is not found any leakage which is potential to pollute the environment						documents : SOP, types of waste and waste management
			2. Type of waste (solid, liquid, and aerial) identification document from the results of the Plantation business actor's operational activity	√			√			Non-compliant If does not have documents : SOP, types of waste and waste management
			3. Waste (solid, liquid, and aerial) management document conforms to the legalized procedure and protocol	√					√	
			2. Having the document of waste management	1. The records of waste (solid, liquid, and	√		√		√	Compliant If has the

			and monitoring reporting to the authorized instances	aerial) management implementation conforms to the waste management and monitoring reporting						document of implementation records and waste management report
				2. Waste (solid, liquid, and aerial) management and monitoring report has been reported on periodical basis to the authorized instances in accordance with the applicable regulation	√		√	√		Non-compliant: If does not have the document of implementation records and waste management report
			3. Having the permit documents from the regional government for the dumping of waste water to the waterbody	It is available the permit to dump liquid waste of palm oil mill to the water-body from the authorized instances and	√		√			Compliant If has the document of waste dumping permit.

				is still valid						Non-compliant If does not have the document of waste dumping permit.
			4. Having the permit document from the minister who organizes the government affairs in environment sector for processing units which dump waste water to the sea	It is available the permit to dump liquid waste of palm oil mill to the sea from the authorized instances and is still valid	√		√			Compliant If has a waste water dumping permit. Non-compliant If does not have waste water dumping permit.
			5. The fulfillment of quality standard for waste water which is dumped and/or utilized in accordance with the quality standard of dumped and/or utilized	It is available the document of test result from an accredited laboratory and shows that all testing parameters are already in conformance to the	√		√			Compliant If has the document of test result. Non-compliant If does not have

			waste water.	designated quality standard for the dumping and/or utilization of palm oil mill's liquid waste in accordance with the applicable regulation					document of test result.
		3.3 Disturbances from immobile sources: Disturbances from immobile sources in the form of technical standard on noise, vibration level standard, smell degree standard and other degrees of disturbance standard are designated in accordance with the statutory regulation (<i>I, P</i>)	1. Having a SOP or working instructions to handle any disturbances from immobile sources in accordance with the guidance issued by the Ministry which organizes the government affairs in environment sector	1. It is available a SOP/working instructions which inform the procedure to manage any disturbances from immobile sources in accordance with the applicable regulation	√		√		Compliant If has a SOP/working instructions. Non-compliant If does not have a SOP/working instructions.
				2. It is available a	√		√		

				document for identifying the emission and ambient resulting from any immobile sources' disturbances from the operational activity of the Plantation Business actor					
			2. It is available a report on the results of technical standard measurement on any disturbances from immobile sources to the regional government	1. It is available a document of test results from an accredited laboratory and shows that all testing parameters are already in conformance to the designated quality standard for any disturbances from immobile sources in	√		√		<p>Compliant</p> <p>If has a document of test results and report of the raw material measurement results</p> <p>Non-compliant</p> <p>If does not have a document of</p>

				accordance with the applicable regulation						test results and report of the raw material measurement results
				2. Report on the results of technical standard measurement on any disturbances from immobile sources has been submitted on periodical basis to the authorized instances in accordance with the environmental permit and/or the applicable regulation						
			3. It is available a document on the handling of any	It is available a plan and realization of the handling on any	√		√		√	Compliant If has the document

			disturbances from immobile sources.	disturbances from immobile sources in accordance with the procedure (SOP/working instructions)						<p>Non-compliant</p> <p>If does not have the document</p>
			4. The fulfillment of quality standard for air emission from all of existing emission sources	It is available the document of test result from an accredited laboratory, which shows that all testing parameters are already in conformance to the designated quality standard for air emission at palm oil mill's which is in accordance with the environmental permit and/or the relevant environmental	√		√			<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>

				documents						
		<p>3.4 Waste Monitoring</p> <p>The Plantation business actor must utilize waste to improve efficiency and reduce environmental impact (<i>I, B, P</i>)</p>	<p>1. It is available a SOP which confirms:</p>	<p>1. Having a SOP on the utilization of waste (solid, liquid and aerial)</p> <p>(a) the utilization of solid waste in the form of fiber, shells and empty 'janjang' to replace fossil fuel</p> <p>(b) the utilization of bunches/empty 'janjang' for organic fertilizer, the utilization of liquid waste in the form of Land Application (LA) for fertilization</p>	√		√	√		<p>Compliant</p> <p>If has a SOP</p> <p>Non-compliant</p> <p>If does not have SOP</p>
				<p>2. Document on the identification of benefits from solid,</p>	√		√	√		

				liquid and aerial wastes						
			2. The Plantation Business actor has carried out the utilization of waste and	1. The realization of waste utilization implementation	√			√	√	Compliant If has the document
			an evidence on the implementation of solid, liquid, gas/ aerial wastes, including the effort to ensure that there is no negative impact to the workers and the people.	2. It is a document on the implementation of waste utilization	√		√			Non-compliant If does not have the document
			3. Having a report on the results of supervision and the management process and/or waste utilization which is reported on periodical basis to local	It is available a report on waste utilization to the related instances	√		√	√		Compliant If has the document Non-compliant If does not have the document

			environmental service							
		<p>3.5 Management on Hazardous and Toxic (B3) Materials as well as Hazardous and Toxic (B3) Waste</p> <p>Hazardous and toxic materials and Hazardous and toxic waste must be managed in accordance with the statutory regulation B, P)</p>	<p>1. Having a SOP or working instructions and its implementation in relation to the management of B3 and B3 waste.</p>	<p>1. It is available a SOP/working instructions concerning the management of B3 and B3 waste</p>	√		√	√		<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				<p>2. It is available an evidence of the implementation of B3 and B3 waste management</p>	√		√	√		
			<p>2. Having a document of monitoring results on the implementation of</p>	<p>It is available a document on the monitoring results of</p>	√		√	√		<p>Compliant</p> <p>If has the document</p>

			available B3 and B3 waste management procedure	the implementation of any existing B3 and B3 waste management procedure						Non-compliant If does not have the document
			3. Having a permit and Temporary storage of B3 waste issued by the Regent/Mayor	1. It is available a Permit for temporary storage place of B3 waste which is still valid and conforms to the name of said Plantation business actor	√		√			Compliant If has the document Non-compliant If does not have the document
				2. There is a conformance between the type of B3 waste included in temporary storage place of B3 waste permit and the B3 waste generated and stored	√		√		√	

			<p>3. The temporary storage place of B3 waste must meet the following conditions:</p> <p>Site requirements:</p> <p>(a) The location of temporary storage place site is within the activity area which is a free from flood area</p> <p>(b) Distance to the river (flowing all the year-long) is minimum 50 meters</p> <p>(c) Distance of the site is minimum 100 meters to settlements area or public facility</p>	√				√	
--	--	--	--	---	--	--	--	---	--

				(d) Distance of the site to any facilities of those protected areas such as natural conservation, protected forest, preservation area is minimum 300 meters					
			4. has the document concerning a cooperation agreement with a third party holding a permit from the related instances to handle B3 waste	1. The cooperation document covers a gatherer and/or transporter and/or processor of B3 waste.	√		√	√	<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. The gathering and/or transporting parties must have a cooperation document with B3 waste processor	√		√	√	

				3. The gathering and/or transporting and/or processing parties must have a valid permit	√		√	√		
			5. Has the document of B3 waste storage and handling in accordance with the applicable regulation	It is available a balance sheet document (in and out register) of B3 waste generated, managed further from those stored at the temporary storage place of B3 waste	√		√	√		<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
			6. B3 waste is only allowed to sell/handover to a party holding a permit from the Ministry of environment and forestry, and Director	1. It is available the manifest of B3 waste dispatch for the type of B3 waste that has been transported out of the temporary storage place of B3	√		√	√		<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>

			general of transportation	waste					
				2. It is available a report on the manifest of B3 waste dispatch on periodical basis once in every 3 (three) months to the related instances	√		√	√	
				3. There is a conformance between the receiver of B3 waste in manifest to the document of cooperation	√		√	√	
		<p>3.6 Fire and Natural Disaster Control</p> <p>The Plantation business actor must do a fire prevention and handling, as well as natural disaster handling (I, B, P)</p>	1. Has a SOP on land fire prevention and handling	1. It is available a SOP which informs the written policies that have been approved by the management that it is not allowable any burning activity within	√		√	√	<p>Compliant</p> <p>If has a SOP and the document of dissemination</p> <p>Non-compliant</p>

				the operating area of Plantation Business actor.						If does not have SOP and the document of dissemination
				2. It is available a record on the dissemination to all Plantation Business actor management, workers and public which states that it is not allowable any burning activity within the operating area of Plantation Business actor	√		√	√		
				3. has a SOP/procedure which informs the fire prevention, handling and control that has been approved by the	√		√	√		

				authorized management of Plantation business actor and it is available an evidence of procedure receipt by the plantation firefighting team					
			2. Has the human resources (HR) who are able to prevent and handle any land fire	1. It is available a fire fighting team/unit that has undergone a training on fire prevention and handling from the authorized instances	√		√	√	<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. It is available a document of periodical training on fire prevention and handling	√		√	√	

			3. Has a fire control facilities and infrastructure in accordance with the statutory regulation	1. It is available a document on fire control facilities and infrastructure in accordance with the statutory regulation	√		√	√		<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. Conducting a periodical updating and checking on fire control/handling facilities and infrastructure	√		√	√		
			4. Providing a budget for land fire prevention and handling	It is available a budget for fire prevention and handling	√		√	√		<p>Compliant</p> <p>If has a budget</p> <p>Non-compliant</p> <p>If does not have a budget</p>
			5. Has a document on the	1. It is available a document on the	√		√	√		<p>Compliant</p> <p>If has the</p>

			implementation of fire prevention, handling, monitoring and the maintenance of facilities and infrastructure as well as its reporting.	implementation of fire prevention, monitoring and handling						document Non-compliant If does not have the document
				2. It is available a document on the maintenance of fire facilities and infrastructure	√		√	√		
				3. It is available a report on the implementation of fire prevention and handling, which is reported once in every 6 (six) months to the related instances	√		√	√		
		3.7 Protected Area and	1. Has a results of	1. It is available	√	√	√	√	√	Compliant

		<p>area of High Conservation Value</p> <p>The Plantation Business actor must do the identification, dissemination and maintenance on protected and high conservation value areas in accordance with the statutory regulation (I, B, P). Note: replaced to be 3.7</p>	<p>identification on protected areas and areas of high conservation value.</p>	<p>a document on the results of identification on protected areas and areas of high conservation value within the company's concession area.</p>							<p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				<p>2. Information on protected areas and areas of high conservation value is already in compliance with the currently applicable legislation</p>	√	√	√	√	√		

				and confirmed by the management of Plantation Business actor.						
			2. Has a SOP on the maintenance of protected areas and areas of high conservation value.	1. It is available a SOP which contains the mechanism of dissemination, management and monitoring on the protected areas and areas of high conservation value.	√		√	√		<p>Compliant If has a SOP</p> <p>Non-compliant If does not have SOP</p>
				2. There is a conformance between SOP to the currently applicable statutory regulation.		√	√			
			3. Has the site map and the Management Plan	1. It is available the site map of	√		√			<p>Compliant If has a map</p>

			on areas of High Conservation Value and other identified protected areas	protected areas and High Conservation Value areas that is consistent with such document on the identification of protected areas and High Conservation Value areas as well as having been approved by the management of Plantation Business actor						Non-compliant If does not have a map
				2. Map was prepared with the minimum scale of 1:50.000		√	√			
				3. It is available a Management Plan on High Conservation	√		√			

				Value areas and other identified protected areas						
			4. Doing the dissemination on protected areas and High Conservation Value areas to the manpower and the people around the plantation	1. It is available a document on the plan of dissemination on protected areas and High Conservation Value areas to the manpower and the people around the plantation		√	√			<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. It is available a documented evidence/record of periodical dissemination activity on protected areas and High Conservation Value areas to the	√		√	√		

				manpower and the people around the plantation						
			5. Doing activities in the context of preserving protected areas and high conservation value areas as well as reporting it to the authorized instances	1. It is available a record on the management of High Conservation Value areas and other protected areas in accordance with the document of identification results	√		√		√	<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. It is available a record of results on the monitoring on the protected areas and High Conservation Value areas management activity of at least once in every	√		√	√		

				year					
				3. It is available the report on protected areas and areas of high conservation value management and monitoring which is submitted to the related government instances	√		√	√	
		3.7.1. Biodiversity Conservation The Plantation Business actor must conduct a biodiversity conservation at the areas managed (I, B)	1. Has a SOP on the preservation of Biodiversity	It is available a SOP containing the documentation on Biodiversity preservation	√		√	√	Compliant If has a SOP Non-compliant If does not have SOP
			2. Has a list of priority plants and animal species at the plantation and plantation	1. It is available a list of protected plants and animal species at the plantation prior to the	√		√		Compliant If has the document

			surrounding area (from the environmental documents) before and after the commencement of plantation business	commencement of activity at the plantation						Non-compliant If does not have the document
				2. It is available a monitoring plan on priority plants and animals at the plantation and around the plantation		√	√			
				3. It is available an updated document on the list of priority plants and animal species at the plantation and around the plantation based on monitoring results	√		√	√		Compliant If has the document Non-compliant If does not have the document
			3. Has a report on the	It is available an		√	√	√		Compliant

			presence of priority plants and animals which is submitted to the institution handling the conservation and protection to wild plants and animals	updated document of report on the presence of priority plants and animals						If has the document Non-compliant If does not have the document
			4. Conducting a dissemination to the local people on the presence of priority plants and animals , if there are protected plants and animal species	1. It is available a document on the dissemination plan to local people on the presence of priority plants and animals , if there are protected plants and animal species	√		√	√		
				2. It is available a documented evidence/record on the periodical	√		√	√		

				dissemination to local people on the presence of priority plants and animals						
			5. The handling in the event of an incident with priority animals and/or wild animals	1. It is available a record on the handling in the event of an incident with priority animals and/or wild animals	√		√	√		<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. It is available an evidence of reporting on the recorded handling to local Natural Resources Conservation Agency	√		√	√		
		3.7.2. Conservation on the source and quality of water (I, B, P)	1. Has a SOP on the identification, management and	1. It is available a documented SOP which regulates the	√		√	√		<p>Compliant</p> <p>If has a SOP</p>

			conservation on the source and quality of water and it is available a map of water body.	procedure of doing the identification, management and conservation on the source and quality of water in accordance with the applicable regulation						Non-compliant If does not have SOP
				2. It is available a result of identification on the sources of water equipped with a map that informs the location of waterbody.	√		√	√		
			2. Has a monitoring program on the quality of surface water	Document of monitoring program on the quality of surface water on periodical basis	√		√			Compliant If has the document Non-compliant If does not have

										the document
			3. Has a document of water management, preservation on water sources and measurement on the quality of water	1. It is available a document of the program to manage, preserve and measure the quality of water available at the plantation area in accordance with the statutory requirements	√		√			<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. It is available a record /documented evidence on the application of water management, sources of water preservation and the measurement of water quality through the results of test on water quality at an	√		√	√	√	

				accredited laboratory on periodical basis						
		<p>3.7.3. Conservation on areas with high potential of erosion</p> <p>A Plantation business actor must do a conservation of land and avoid a high potential of erosion in accordance with the statutory regulation (I, B, P)</p>	<p>1. Has a SOP on the conservation of areas with high potential of erosion</p>	<p>It is available a documented SOP which regulates the procedure of doing an identification on areas with high potential of erosion and its conservation plan in accordance with the applicable regulation</p>	√		√			<p>Compliant</p> <p>If has a SOP</p> <p>Non-compliant</p> <p>If does not have SOP</p>
			<p>2. Has a topographic map and river spread locations</p>	<p>1. It is available an updated topographic map of the plantation area</p>	√		√	√		<p>Compliant</p> <p>If has a map</p> <p>Non-compliant</p> <p>If does not have map</p>
				<p>2. It is available a site map of areas with high potential of</p>	√		√			

				erosion						
			3. Has a document on the implementation of conservation on the areas with high potential of erosion	1. It is available a document of conservation program on the areas with high potential of erosion		√	√		√	<p>Compliant</p> <p>If has the document</p> <p>Non-compliant</p> <p>If does not have the document</p>
				2. A record of conservation activity on areas with erosion potential	√		√	√		
		<p>3.8 Mitigation on Greenhouse Gases (GHG) emission</p> <p>The Plantation Business actor must conduct an inventory and mitigation on the source of GHG's emission(I, B, P)</p>	1. Has a sop on the mitigation of Greenhouse Gases (GHG)'s emission	1. It is available a documented SOP on the identification procedure of greenhouse gas sources	√		√	√		<p>Compliant</p> <p>SOP and GHG calculation are available</p> <p>Non-compliant</p> <p>Does not have SOP and</p>

										applicable reference GHG calculation.
				2. It is available a SOP on GHG calculation and identification of the source of data and the use of most updated emission factors in accordance with the applicable rule and reference.		√	√	√		
			2. Has an inventory of GHG;s emission sources	1. Document on the results of inventory on GHG;s emission sources.	√		√	√		Compliant Have documented and documented supporting data
				2. It is available documented supporting documents for GHG		√	√	√		Non-compliant Does not have

				calculation.						documents and
			3. Has the results of GHG calculation	It is available a document on the correct result of GHG calculation in accordance with sources of data and the applicable reference	√		√	√		documented supporting data
			4. Has a document of land's history	It is available a document on the analysis of land change starting from such land as included in the last updated of ISPO's GHG calculator	√		√	√		<p>Compliant</p> <p>Have a document</p> <p>Non-compliant</p> <p>Does not have a document</p>
			5. Has a document on GHG mitigation	1. It is available the last updated GHG reduction program		√	√			<p>Compliant</p> <p>If documents and records are available</p> <p>Non-compliant</p>

										If documents and records are not available
				2. It is a record on the activity of GHG reduction program	√		√		√	
		3.9 Plantation business actor does a protection on Natural and peatland forests (I, B, P)	1. It is available a document which shows that the development of a new plantation does not open natural forests and peat-moss land, in accordance with the applicable statutory regulation.	1. Map of a harmonious combination between the plantation operational area and natural forests.	√		√	√	√	Compliant Have a document
				2. Map of a harmonious combination between the plantation area/mill and the last revised Indicative Map on the postponement of new permit issuance (PIPPIB)	√		√	√	√	Non-compliant Does not have a document

				3. It is available a record that the Plantation business actor did not open any forests and peatland areas	√		√	√	√	
			2. It is available a record of implementation for protection forest and peatland	1. It is available a document of Plantation Business actor's policy in respect of the protection to forest areas and peatland areas set forth in the current PIPPIB requirements, and signed by the top management		√	√	√		<p>Compliant</p> <p>Have a document</p> <p>Non-compliant</p> <p>Does not have a document</p>
				2. It is available a documented SOP on peatland area	√		√	√		

				management and protection procedure						
				3. It is a record on the application of SOP on peatland area management and protection procedure	√		√	√		
4.	RESPONSIBILITY FOR LABOR	4.1 Occupational safety and health (OSH) Applying OSH system (I, B, P)	1. Has a OSH documentation that covers : adequate policies, procedures and resources at the working environment including the handling on emergency situation, natural disaster and accidents	1. It is available the current policy on OSH and signed by top management	√		√			Compliant If OSH policy documents and socialized are available. Non-compliant If OSH policy documents and socialized are not available.
				2. It is available an evidence of dissemination to all of	√		√	√	√	

				workers as well as the management and contractor's workers on OSH policy and SOP on OSH that pertain to OSH application, the handling on emergency situation, natural disaster and accident						
			2. Has an emergency response organization and system	1. It is available an emergency response organizational structure which is legalized by the management.	√		√	√		<p>Compliant</p> <p>If having an organizational structure document and SOP.</p> <p>Non-compliant</p> <p>If not having an organizational structure</p>
				2. The understanding of the emergency response organizational team on emergency situation handling procedure.		√		√		

										document and SOP.
			3. It is available a SOP on the preparedness and emergency response.							
		3. It is available the emergency response (natural disaster and fire) facilities and infrastructure which are checked periodically and placed at an easily accessible when required	1. It is available firefighting facility and infrastructure at the operational area of Plantation business actor, particularly POM that is in compliance with the applicable legislation.	√		√	√	√		Compliant If having fire extinguishing facilities and infrastructure in accordance with applicable legislation.
			2. It is available an evacuation facility.	√				√		Non-compliant If not having fire extinguishing facilities and
			3. The quantity	√		√		√		

				of firefighting facility and infrastructure is adequate in accordance with the applicable regulation.						infrastructure in accordance with applicable legislation.
				4. An easily accessible firefighting facility and infrastructure.		√			√	
				5. It is available a program and the realization of firefighting facility and infrastructure maintenance and/or replacement in accordance with their types and regulations		√	√		√	
			4. It has been established a OSH	1. It is available an SK on the	√		√	√	√	Compliant

			organization with an adequate number of personnel in accordance with the applicable statutory regulation.	legalization of OSH Committee team by the related instances which conforms to the personnel of OSH.						If having most recent OSH Committee team validation decree (SK).
				2. Having a OSH Committee secretary which holds the latest OSH EXPERT certificate in accordance with the applicable requirements.	√		√	√		Non-compliant If not having most recent OSH Committee team validation decree (SK).
				3. It is available a record of OSH Committee meeting result to monitor the implementation of OSH along with the evidence of OSH						

				adjustment that needs to do.						
			5. Results of risk identification and application plan which is socialized to the management and workers	1. It is available the results of risk identification and application plan at each operational activity at the Plantation Business actor's premises by competent officers	√		√	√		Compliant If having a document Non-compliant If not having a document
				2. It is available the results of risk identification and management plan at each operational activity at the Plantation Business actor's premises by competent officers.	√		√	√		
				3. It is available	√		√	√		

				an evidence of dissemination about the results of risk identification and risk management plan for all levels of workers.							
				4. All of workers have a sufficient understanding on OSH risk at their department.		√		√		√	
				5. It is available an evidence on the implementation of all OSH risk identification results.							
			6. Posting OSH instructions at strategic locations, based on the identified risk potentials	1. It is available signs of danger at those locations the risk of which has been identified in accordance		√		√		√	Compliant If having hazard signs on site and is maintained.

				with the types of risk						Non-compliant
				2. The provision of signs already met the applicable regulation concerning the posting of signs of danger.		√			√	If it does not have hazard signs on site and is not maintained.
		7. The Plantation Business actor to conduct a periodical medical check-up for all of the workers and a specific medical checkup for workers with a certain risk. The checkup results are evaluated and followed-up properly if it is found any worker who suffers an occupational illness.		1. It is available a list of workers on whom it must be conducted a periodical medical checkup and a specific medical checkup for workers with a certain and most current risk	√		√	√		Compliant If having a list of workers, that must be conducted a periodical medical checkup and a specific medical checkup for workers with a certain risk.
				2. It is available	√		√	√	√	Non-compliant

				an evidence of the implementation of periodic medical checkup and specific medical checkup for workers with a certain risk according to the list available						If does not have a list of workers, that must be conducted a periodical medical checkup and a specific medical checkup for workers with a certain risk.
				3. It is available the evidence of periodic medical checkup by special personnel in accordance with the applicable statutory regulation and a follow-up on the	√		√	√	√	

				medical checkup results					
				4. It is available an evidence of follow-up on the results of periodic medical checkup and specific medical checkup for workers with a certain risk	√		√	√	
				5. It is available a certified OSH expert on firefighting to handle fire prevention system	√		√	√	
			8. All workers have an adequate OSH training	1. It is available a periodic OSH training program for all levels of workers	√		√	√	Compliant If having a document on OSH training plan regularly and up to date.
				2. It is available an evidence of OSH	√		√	√	

			training for all workers according to the existing training program						Non-compliant If does not have a document on OSH training plan regularly and up to date.
		9. Plantation business actor provides an adequate personal protective equipment (PPE) according to its intended allocation for each worker	1. It is available an adequate PPE for the workers according to risk identification	√			√	√	Compliant The workers use PPE according to the risk of their work.
			2. It is available an PPE replacement program according to the use period from PPE manufacturer		√	√	√	√	Non-compliant The workers does not use PPE according to the risk of their work.
			3. It is available a		√	√		√	

			documentation as an evidence of PPE provision to the workers in accordance with their working risk						
			4. It is available PPE for all of workers to anticipate any damaged PPE						
		10. A report on the application of OSH is reported per 3 (three) months to the Manpower Service	1. It is available a report on the application of OSH program in accordance with the applicable statutory regulation	√		√	√	√	<p>Compliant</p> <p>The OSH program implementation report document is available in full according to the plan.</p> <p>Non-compliant</p> <p>The OSH</p>
			2. It is available a documented evidence on the submission of OSH application report	√		√	√		

				per 3 (three) months to local Manpower Service and an evidence that the report has been received						program implementation report document is not available completely according to the plan.
		4.2 Fulfilling administrative requirements in respect of employment relationship (I, B, P)	1. Has a SOP on the recruitment of workers and the recruitment process does not encumber workers with recruitment cost nor doing any retention of documents	1. It is available a SOP on the recruitment of workers in which it is provided the manpower recruitment procedure and the requirements of workers to hire for all types of job, a prohibition to employ child labor, and a prohibition on any discrimination in	√		√	√		<p>Compliant</p> <p>If having a worker recruitment SOP and its requirements.</p> <p>Non-compliant</p> <p>If not having a worker recruitment SOP and its requirements.</p>

			employment.						
			2. Plantation Business actor and manpower agent (if using a recruiting agent) do not impose any collection of fee to the manpower.	√		√	√		<p>Compliant If having documents.</p> <p>Non-compliant If not having documents.</p>
			3. Plantation Business actor and manpower agent (if using a recruiting agent) do not do any retention to the original documents belonging to manpower except under a reason justifiable by the applicable regulation.	√		√	√		
			4. The	√		√	√		

			announcement of manpower recruitment and its requirements for all levels of workers to be informed publicly.						
		2. It is available a written policy which states that the Plantation Business actor prohibits any forms of forced labor or slavery in conducting its operational activity.	1. Plantation Business actor has a written policy on the prohibition to all forms of forced labor or slavery in conducting its operational activity which is signed by the top management of the Plantation Business actor.	√		√	√	√	<p>Compliant</p> <p>If having a written policy document on the prohibition of all forms of forced labor or slavery.</p> <p>Non-compliant</p> <p>If does not have</p>
			2. Plantation Business actor does the dissemination and communication on the	√		√	√	√	<p>a written policy document on the prohibition of all forms of</p>

				policy of prohibiting any forms of forced labor or slavery to all levels of workers of Plantation Business actor , contractor’s workers and local people						forced labor or slavery.
				3. There is no form of forced labor or slavery in conducting its operational activity.	√			√		
		3. Workers have the right of resting-time and take a leave in accordance with the applicable law on manpower.	1. It is available a written rule which regulates leave right and working hours in accordance with the applicable law on manpower	√		√	√			Compliant If having a document on the regulations of Plantation Business actor that regulate the right to leave
			2. It is available	√		√	√			

				a document that shows the realization of the rule which regulates leave right and working hours in accordance with the currently applicable law on manpower.						and working hours in accordance with the applicable legal regulations. Non-compliant
				3. It is available a record on the dissemination of the regulation in respect of the workers' working hours and leave right in accordance with the currently applicable law on manpower		√	√	√		If does not have a document on the regulations of Plantation Business actor that regulate the right to leave and working hours in accordance with the applicable legal

										regulations.
				4. There is a record on the application of the Plantation business actor's regulation in respect of the workers' working hours and leave right in accordance with the currently applicable law on manpower						
		4. Each worker has a copy of employment relationship document in accordance with the applicable law on manpower	1. It is available a document on employment relationship containing at least the following information: a. name and address of the company b. name, sex, age and							<p>Compliant</p> <p>If having a contract document in accordance with the requirements.</p> <p>Non-compliant</p>

				address of worker c. position or type of work d. scope of work e. rate of wage, allowances and method of payment f. the Plantation business actor's regulation and sanctions applicable g. workers' and the company's rights and obligations h. the validity period of employment agreement i. date on which the employment agreement is made						If does not have a contract document in accordance with the requirements or a work contract document is available but the contents are not in accordance with the requirements.
--	--	--	--	--	--	--	--	--	--	---

			j. both parties' (worker and the company) signatures						
			2. All of workers have a copy of employment relationship document already signed by both parties.	√		√	√		
		5. The Plantation Business actor who employs expatriate manpower must show RPTKA (expatriate placement plan), IMTA	1. It is available RPTKA (expatriate placement plan) document (if there is expatriate worker being employed)	√		√	√	√	Compliant If having a RPTKA document (Plan for the Use of Foreign
		(work permit), as well as complying with any regulation in respect of expatriate manpower employment.	2. It is available IMTA document.	√		√	√	√	Workers (if there are foreign workers). Non-compliant If does not have a RPTKA

										document (Plan for the Use of Foreign Workers (if there are foreign workers)).
			6. 										<p>Non-compliant</p> <p>If data is not available.</p>
				3. Realization of personnel training is available.	√		√	√		<p>Compliant</p> <p>If data is available.</p> <p>Non-compliant</p> <p>If data is not available.</p>
				4. An evaluation of training results is available.		√	√	√		<p>Compliant</p> <p>If data is available.</p> <p>Non-compliant</p> <p>If data is not available.</p>
			8. Has adequate infrastructure in the implementation and	1. There is a storage capacity layout for ISPO certified products	√		√	√	√	<p>Compliant</p> <p>If there is a storage layout</p>

			maintenance of the supply chain system.	according to the production capacity.						document available. Non-compliant If no document storage layout is available.
				2. There is a balance infrastructure that has been calibrated.	√		√	√	√	Compliant If there is infrastructure and tera data. Non-compliant If there is no infrastructure and tera data.
				3. There is an information management system that supports the supply	√		√	√	√	Compliant If an information management

				chain system and is implemented.					system is available. Non-compliant If no Information management system is available.
			9. Registration of total production and sales quantities of the ISPO certified products.	1. A copy of the transaction reporting for ISPO certified products is available to Certification Bodies that issue ISPO certificates before delivery.	√		√	√	Compliant If having reporting records. Non-compliant If not having reporting records
				2. When an ISPO IT system is available,	√		√	√	Compliant If registered and

				transaction registration and reporting must be carried out in the IT system before delivery.					have proof of reporting Non-compliant If it is not registered and has proof of reporting
7	IMPROVEMENT OF SUSTAINABLE BUSINESS Plantation Business actors and the product processing unit is obliged to improve performance (technical, economic, social and environmental) in a sustainable manner by developing and	7.1 Has a system to monitor & update the validity period of all legal documents (I, B, P)	1. Has a list of all legal documents held by a Plantation Business actor which contains the following information but is not limited to: a. document name, b. document issue date, c. expiration date of the document.	1. There is a mechanism to monitor and update the legality documents of plantation Business actors.	√		√	√	Compliant If having a list of legal documents. Non-compliant If not having a list of legal documents.
				2. There is a list of documents showing information on the legality of operational	√		√	√	

implementing action plans that support the increase of sustainable production.			activities, including: name, date of issue and expiration date.						
			3. There are personnel who are responsible for all the required documents.		√	√	√		
	2. All legal documents are still valid in accordance with their respective provisions.	1. A plan document and completion target for legality documents in the process (renewal or initial publication) are available.	√		√	√		Compliant If the legal documents are still valid. Non-compliant If it is not a legal document and is no longer valid.	
		2. There are personnel who are responsible for	√		√	√			

				all of the legality documents of Plantation Business actors.						
		7.2 Has Measurable Social Responsibility and Economic Empowerment Programs for Certain Periods (I, B, P)	1. There is a management review document conducted by Plantation Business actors for all operational activities based on sustainable business principles.	1. There is a management review document that is legalized and covers all the operational activities of the Plantation Business actor on the principle of a sustainable business which is routinely carried out at least once a year.	√		√	√		Compliant If having documents. Non-compliant If not having documents.
				2. A record of ISPO internal audit result carried out by personnel who have	√		√	√		

				attended ISPO training is available.					
			2. Plantation Business actors implement improved operational activities based on sustainable business principles.	1. There is a record of corrective and preventive actions from the ISPO internal audit results.	√		√	√	<p>Compliant</p> <p>If having improvement record.</p> <p>Non-compliant</p> <p>If not having improvement record.</p>
				2. There is a follow-up record of the inspection results of the related agencies.	√		√	√	
				3. Records of improvements and increases are available as follow-up of	√		√	√	

				decision of the management review .						
				4. There is a record of the application of new technology as a result of both internal and external research.	√		√	√		
				5. There is an evaluation of each ISPO internal audit improvement activity, management review.	√		√	√
